*Note: Only the major support categories are shown.*

*Note: A utilisation rate may be above 100% due to the fungibility of core supports. This refers to the ability of participants to use their funding flexibly between different support types, albeit within certain limitations.*

**Indicator definitions**

- Active participants with approved plans**: Number of active participants who have an approved plan and reside in the region / have supports relating to the support category in their plan
- Registered active providers**: Number of registered service providers that have provided a support to a participant within the region / support category, over the exposure period
- Participants per provider**: Ratio between the number of active participants and the number of registered service providers
- Provider concentration**: Proportion of provider payments over the exposure period that were paid to the top 10 providers
- Provider growth**: Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
- Provider shrinkage**: Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
- Total plan budgets**: Value of supports committed in participant plans for the exposure period
- Payments**: Value of all payments over the exposure period, including payments to providers, payments to participants, and off-system payments (in-kind and Younger People in Residential Aged Care (YPIRAC))
- Utilisation**: Ratio between payments and total plan budgets
- Outcomes indicator on choice and control**: Proportion of participants who reported in their most recent outcomes survey that they choose who supports them
- Has NDIS helped with choice and control?**: Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control

The green dots indicate the top 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration  
The red dots indicate the bottom 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively poorly under the metric under consideration

*Note: For some metrics – 'good' performance is considered a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need. For other metrics, a 'good' performance is considered a lower score under the metric. For example, a low provider concentration is considered a sign of a competitive market.*
