#### **Indicator definitions**

Active participants with approved plans	Number of active participants who have an approved plan and reside in the district have supports relating to the support category in their plan
Registered active providers	Number of registered service providers that have provided a support to a participant within the district / support category, over the exposure period
Participants per provider	Ratio between the number of active participants and the number of registered service providers
Provider concentration	Proportion of provider payments over the exposure period that were paid to the top 10 providers
Provider growth	Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
Provider shrinkage	Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers tha more than \$10k in payments in both exposure periods have been considered
~	
Total plan budgets	Value of supports committed in participant plans for the exposure period
Payments	Value of all payments over the exposure period, including payments to providers, payments to participants, and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC))
Utilisation	Ratio between payments and total plan budgets
Outcomes indicator on choice and control	Proportion of participants who reported in their most recent outcomes survey that they choose who supports them
Has the NDIS helped with choice and control?	Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control

- The green dots indicate the top 10% of districts / support categories when ranked by performance against benchmark for the given metric in other words performing relatively well under the metric under consideration
- The red dots indicate the bottom 10% of districts / support categories when ranked by performance against benchmark for the given metric in other words performing relatively poorly under the metric under consideration

Note: For some metrics 'good' performance is considered a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need. For other metrics, 'good' performance is considered a lower score under the metric. For example, a low provider concentration is considered a sign of a competitive market.
