

## District: Limestone Coast (phase in date: 1 July 2013) | Support Category: All | All Participants

Missing

Benchmark

Note: A utilisation rate may be above 100% due to the fungibility of core supports. This refers to the ability of participants to use their funding flexibly between different support types, albeit within certain limitations

■ Utilisation

**■** Utilisation

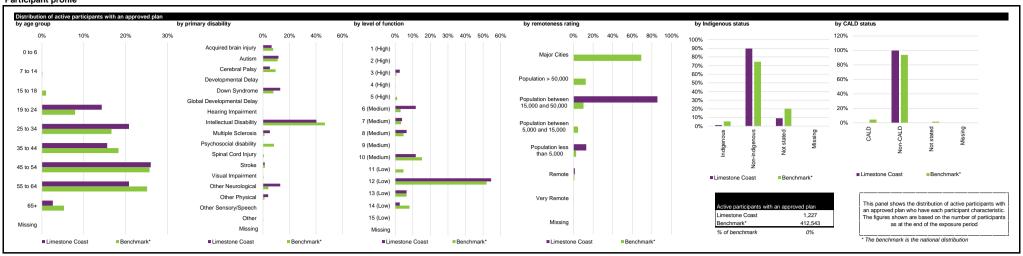

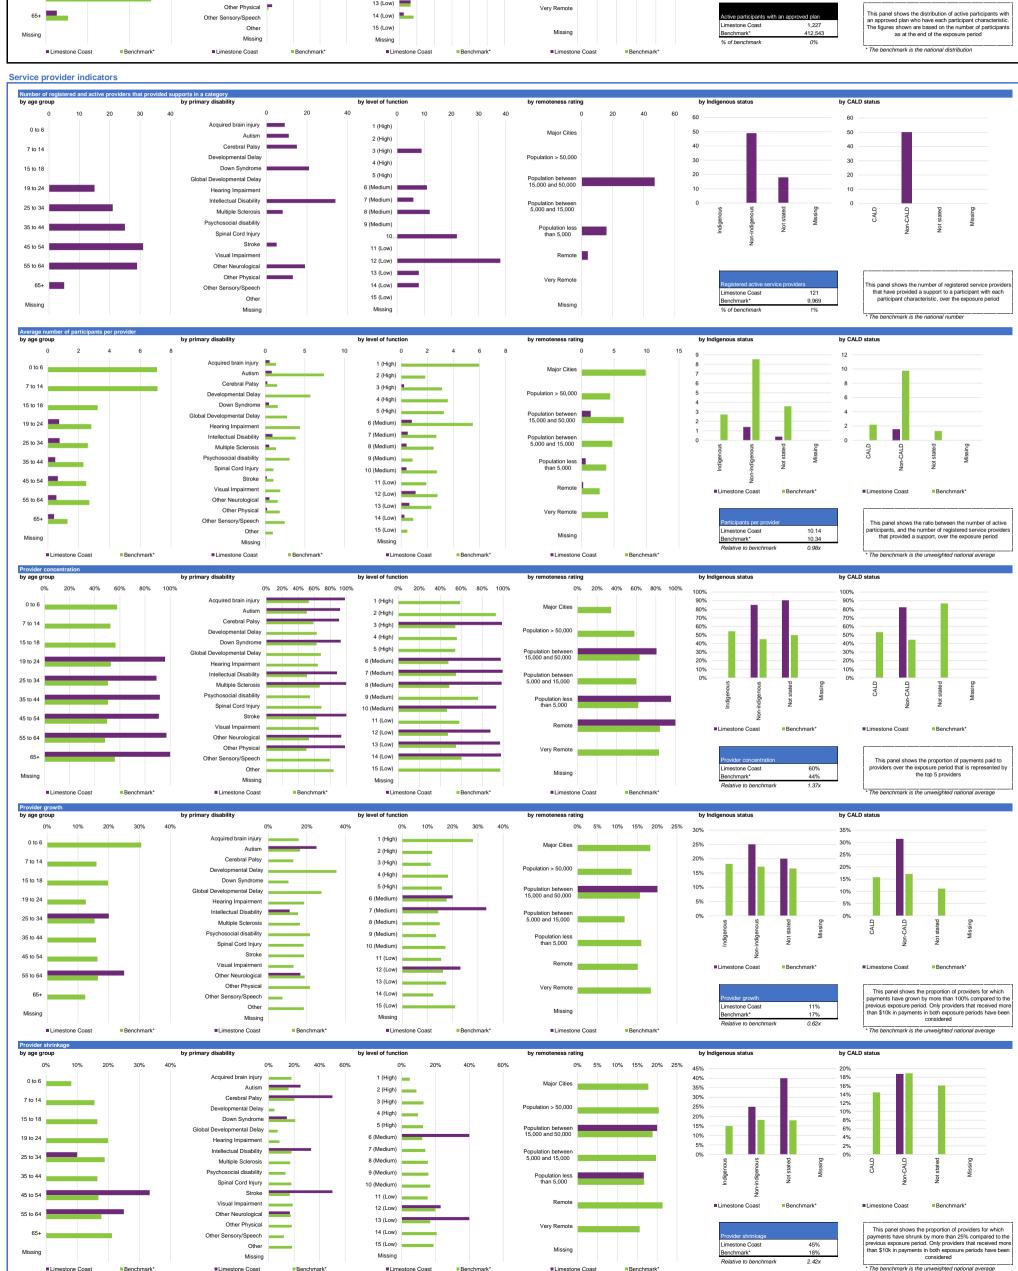

\* The benchmark is the national average, adjusted for the mix of SIL / SDA participants and plan number

| Indicator definitions                                   |   |
|---|---|
| Active participants with approved plans                 | Number of active participants who have an approved plan and reside in the district / have supports relating to the support category in their plan   |
| Registered active providers                             | Number of registered service providers that have provided a support to a participant within the district / support category, over the exposure period   |
| Participants per provider                               | Ratio between the number of active participants and the number of registered service providers  |
| Provider concentration                                  | Proportion of provider payments over the exposure period that were paid to the top 10 providers   |
| Provider growth   | Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered      |
| Provider shrinkage                                      | Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered      |
| Total plan budgets                                      | Value of supports committed in participant plans for the exposure period  |
| Payments  | Value of all payments over the exposure period, including payments to providers, payments to participants, and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC))                             |
| Utilisation   | Ratio between payments and total plan budgets   |
| Outcomes indicator on choice and control                | Proportion of participants who reported in their most recent outcomes survey that they choose who supports them   |
| Has the NDIS helped with choice and control?            | Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control   |
| •   | The green dots indicate the top 10% of districts / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration    |
| •   | The red dots indicate the bottom 10% of districts / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively poorly under the metric under consideration |
| Note: For some metrics – 'good' performance is consider | red a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need.  |
|   | red a lower score under the metric. For example, a low provider concentration is considered a sign of a competitive market.   |

| Indicator definitions                        |  |
|--|--|
| Active participants with approved plans      | Number of active participants who have an approved plan and reside in the district / have supports relating to the support category in their plan  |
| Registered active providers                  | Number of registered service providers that have provided a support to a participant within the district / support category, over the exposure period  |
| Participants per provider                    | Ratio between the number of active participants and the number of registered service providers   |
| Provider concentration                       | Proportion of provider payments over the exposure period that were paid to the top 10 providers  |
| Provider growth                              | Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered   |
| Provider shrinkage                           | Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered   |
|  |  |
| Total plan budgets                           | Value of supports committed in participant plans for the exposure period   |
| Payments                                     | Value of all payments over the exposure period, including payments to providers, payments to pravicipants, and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC))  |
| Utilisation                                  | Ratio between payments and total plan budgets  |
| Outcomes indicator on choice and control     | Proportion of participants who reported in their most recent outcomes survey that they choose who supports them  |
|  |  |
| Has the NDIS helped with choice and control? | Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control  |
| •  | The green dots indicate the top 10% of districts / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration   |
|  | The red dots indicate the bottom 10% of districts / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively poorly under the metric under consideration  |
|  |  |
|  | red a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need.  sistlened allower score under the metric. For example, a low provider concentration is considered as join of a commercial way and a sign of a commercial way and a sign of a commercial way. |

| All support categories  | 1,150                                   | 110                         | 10.5                         | 84%                    | 6%                 | 47%                   | 26.17                       | 12.78          | 49%         | 66%   | 57%  |

| Active participants with approved plans      | Number of active participants who have an approved plan and reside in the district / have supports relating to the support category in their plan   |
|--|---|
| Registered active providers                  | Number of registered service providers that have provided a support to a participant within the district / support category, over the exposure period   |
| Participants per provider                    | Ratio between the number of active participants and the number of registered service providers  |
| Provider concentration                       | Proportion of provider payments over the exposure period that were paid to the top 10 providers   |
| Provider growth                              | Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered      |
| Provider shrinkage                           | Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered      |
| Total plan budgets                           | Value of supports committed in participant plans for the exposure period  |
| Payments                                     | Value of all payments over the exposure period, including payments to providers, payments to providers, payments (in-kind and Younger People In Residential Aged Care (YPIRAC))   |
| Utilisation                                  | Ratio between payments and total plan budgets   |
| Outcomes indicator on choice and control     | Proportion of participants who reported in their most recent outcomes survey that they choose who supports them   |
| Has the NDIS helped with choice and control? | Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control   |
| •  | The green dots indicate the top 10% of districts / support categories when ranked by performance against benchmark for the given metric — in other words — performing relatively well under the metric under consideration    |
| •  | The red dots indicate the bottom 10% of districts / support categories when ranked by performance against benchmark for the given metric — in other words — performing relatively poorly under the metric under consideration |
|  | dered a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need.  |
