Indicator definitions

Active participants with approved plans	Number of active participants who have an approved plan and reside in the service district / have supports relating to the support category in their plan.
Active providers	Number of providers that received payments for supports provided to participants within the service district / support category, over the exposure period.
Participants per provider	Ratio between the number of active participants and the number of active providers.
Provider concentration	Proportion of provider payments over the exposure period that were paid to the top 10 providers.
Provider growth	Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered.
Provider shrinkage	Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered.
Total plan budgets	Value of supports committed in participant plans for the exposure period.
Payments	Value of all payments over the exposure period, including payments to providers, payments to participants and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC)).
Utilisation	Ratio between payments and total plan budgets.
Outcomes indicator on choice and control	Proportion of participants who reported in their most recent outcomes survey that they choose who supports them.
Has the NDIS helped with choice and control?	Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control.

- The green dots indicate the top 10% of service districts / support categories when ranked by performance against benchmark for the given metric in other words performing relatively well under the metric under consideration.
- The red squares indicate the bottom 10% of service districts / support categories when ranked by performance against benchmark for the given metric in other words performing relatively poorly under the metric under consideration.

Note: For some metrics, a 'good' performance is considered a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need. For other metrics, a 'good' performance is considered a lower score under the metric. For example, a low provider concentration is considered a sign of a competitive market.
