

Insights

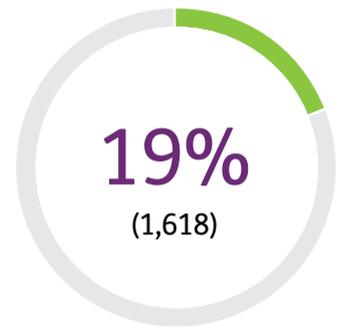

As at 30 September 2022:

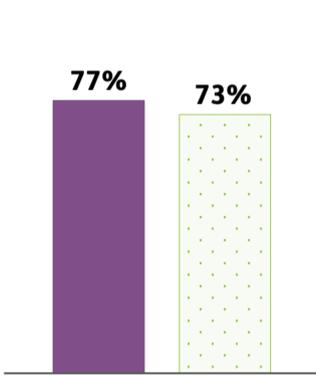

of the **554,917** active participants in the NDIS have a **primary disability of a stroke**

of participants with a stroke disability **are aged 45 years and over**

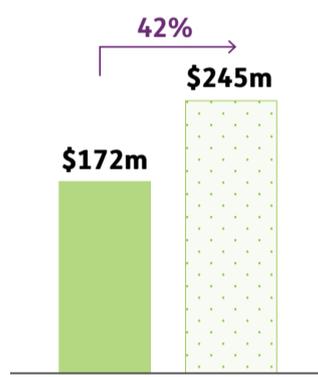

identified as **Culturally and Linguistically Diverse (CALD)**

73%

of access decisions for applicants with a stroke disability resulted in the applicant joining the Scheme in the September 2022 quarter, compared to 77% of access decisions for all applicants

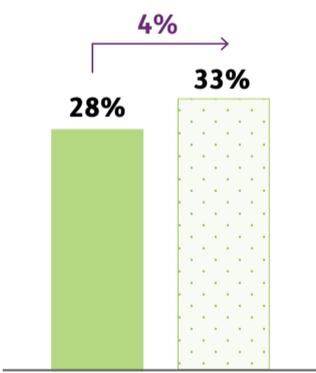

\$245 million

of paid supports were provided to participants with a stroke disability in the September 2022 quarter, compared to **\$172m** in the September 2021 quarter, an increase of 42%

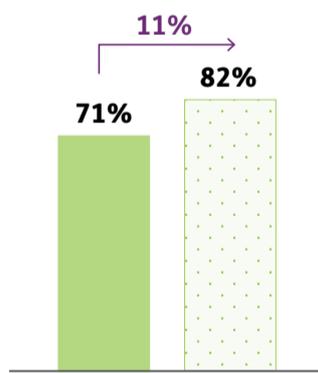

\$108,600

was the average payment in the 12 months to 30 September 2022 for a participant with a stroke disability, a 12% increase compared to the previous year

33%

For participants aged 15 years and over with a stroke disability, 33% said at their latest reassessment that they were actively involved in a community, cultural or religious group in the last 12 months, a 4 percentage point increase compared to baseline⁵

82%

of participants with a stroke disability aged 15 years and over said the NDIS had helped to improve their choice and control at their latest reassessment, an 11 percentage point increase from their first review at 71%⁵

77%

was the weighted average satisfaction rate for participants with a stroke disability over the four stages of the pathway

■ All participants ■ Stroke

“I’m just so thankful for the NDIS, I’m as happy now as I’ve ever been in my life.”

Hande, 24

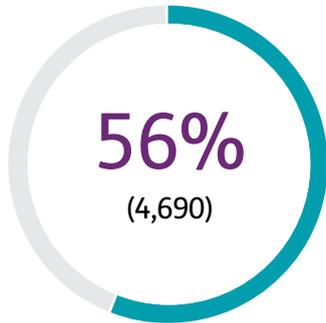

Section 1: Participants

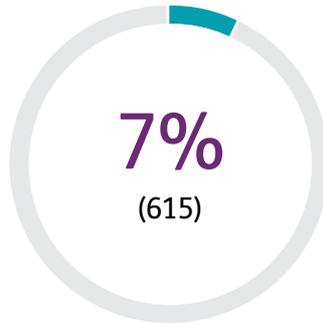

Overview

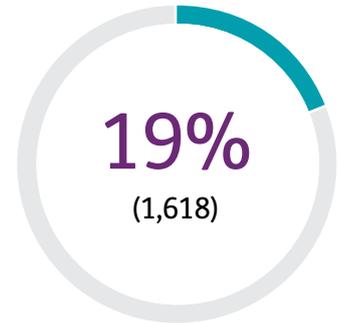

Of the **8,346** active participants with a primary disability of stroke at 30 September 2022:

were male, compared to 61% (or 341,220) for all participants

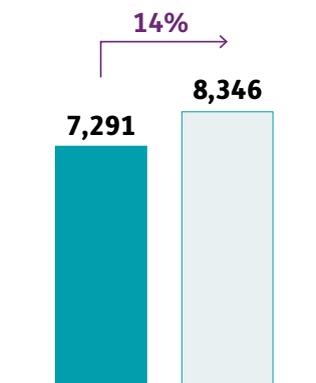

identified themselves as First Nations people, compared to 7% (or 40,842) for all participants

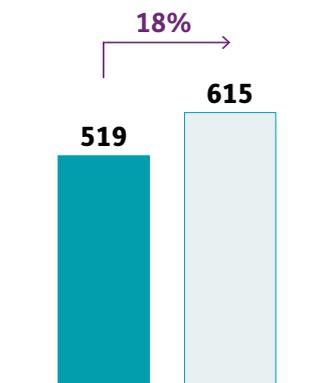

identified as Culturally and Linguistically Diverse (CALD), compared to 9% (or 50,968) for all participants

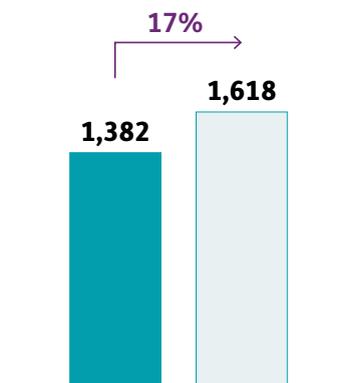

In the twelve months to 30 September 2022:

The number of active participants with a stroke disability has increased from 7,291 to 8,346, an increase of 14%

The number of participants with a stroke disability who identify as First Nations people has increased from 519 to 615, an increase of 18%

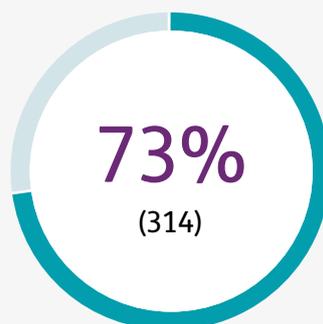

The number of participants with a stroke disability who identify as CALD has increased from 1,382 to 1,618, an increase of 17%

Access

In the quarter to 30 September 2022:

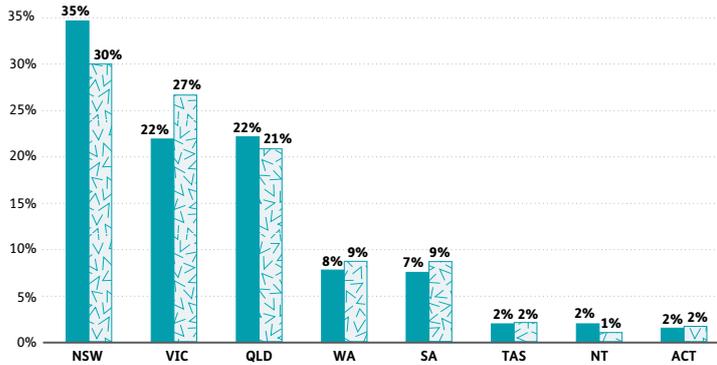

of access decisions for applicants with a stroke disability resulted in the applicant joining the Scheme, compared to 77% of access decisions for all applicants

access decisions have been made for applicants with a stroke disability (314 participants met access and are still active)

Section 2: Payments

Overview

In the September 2022 quarter:

the NDIS provided
\$245 million
of paid supports to participants
with a stroke disability

In the same quarter last year:

the NDIS provided
\$172 million
of paid supports to participants
with a stroke disability

42%↑

The average payment³ per
participant with a stroke
disability was

\$108,600

for the 12 months ending
September 2022

The average payment
per participant with a stroke
disability was

\$97,200

for the 12 months ending
September 2021

12%↑

For participants aged 18 years and over with a stroke disability

In the September 2022 quarter:

7%

were participants
in SIL²

26%

of supports were
paid to participants
in SIL

A year ago:

5%

were participants
in SIL

23%

of supports were
paid to participants
in SIL

Comparing average payments³ for the same group of participants with a stroke disability between this year and last year⁴:

	Sep 22	Sep 21	Change (%)
Aged under 18 years	\$32,600	\$32,000	2% ↑
Aged 18 years and over not in SIL	\$91,100	\$81,300	12% ↑
Aged 18 years and over in SIL	\$421,700	\$430,800	2% ↓
All	\$111,500	\$97,200	15% ↑

Section 3: Participant outcomes and satisfaction

Outcomes

The outcome results at 30 September 2022 compare baseline results to the latest results for participants with a stroke disability who have been in the Scheme for at least two years.⁵

Social and community participation

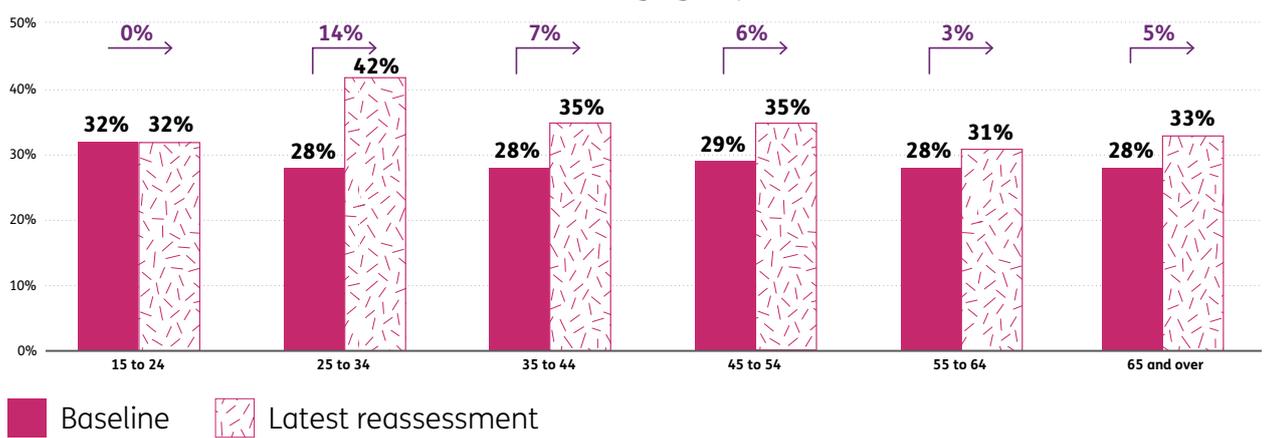

For participants aged 15 years and over with a stroke disability, **33%** said at their latest reassessment that they were actively involved in a community, cultural or religious group in the last 12 months. This compares to **43%** for the Scheme as a whole

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry (or baseline), there has been a:

- **4 percentage point increase** from **28%** to **33%** for participants aged 15 years and over
- **4 percentage point increase** from **28%** to **33%** for participants aged 25 years and over.

The chart below shows outcomes for different age groups.

Participant employment

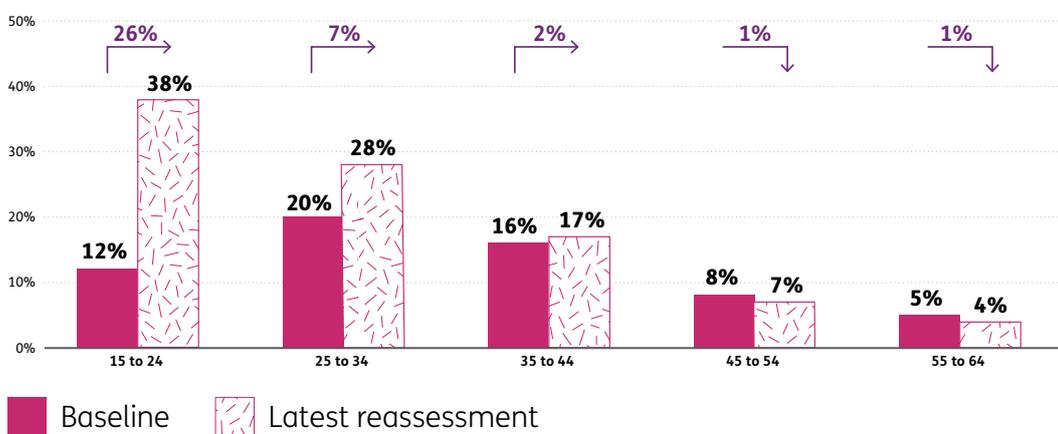

For participants aged 15 to 64 years with a stroke disability, **8%** reported that they had a paid job at their latest reassessment. This compares to **23%** for the Scheme as a whole.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry, there has been a:

- **minimal movement from baseline** of **8%** for participants aged 15–64 years
- **minimal movement from baseline** of **7%** for participants aged 25–64 years.

The chart below shows outcomes for different age groups.

Family and carer employment

Family/carers of participants with a stroke disability reported an employment rate of **44%**, which is **lower** than the Scheme average family/carers employment rate of **50%**.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry, there has been a:

- **12 percentage point increase** from **39%** to **52%** for participants aged 0 to 14 years
- **minimal movement from baseline** of **43%** for participants aged 15 years and over
- **1 percentage point increase** from **42%** to **44%** for participants across all ages.

Choice and control

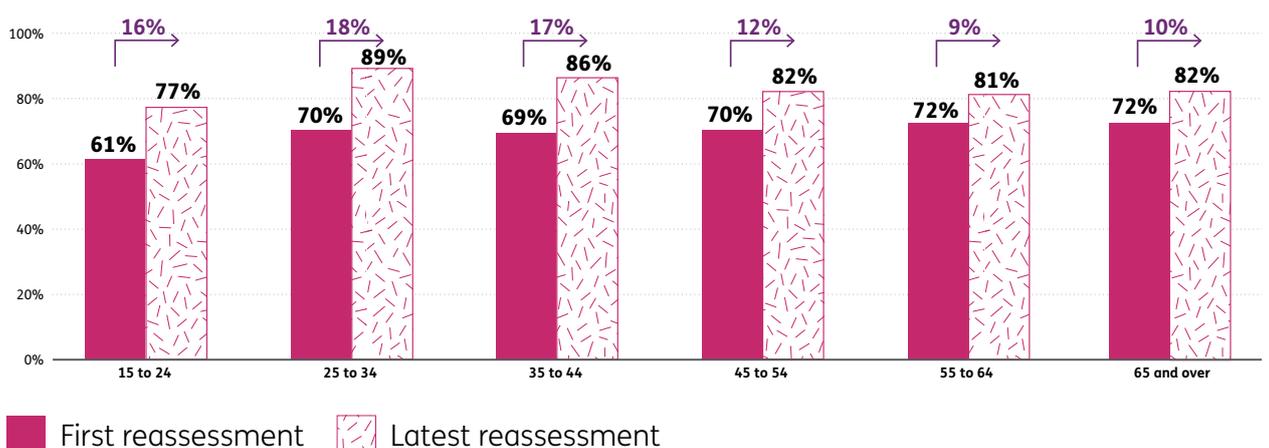

At 30 September 2022, **82%** of participants with a stroke disability aged 15 years and over said the NDIS has helped them have more choice and control over their life, which is **higher** than the Scheme average rate at **76%**.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at their first plan reassessment, there has been an:

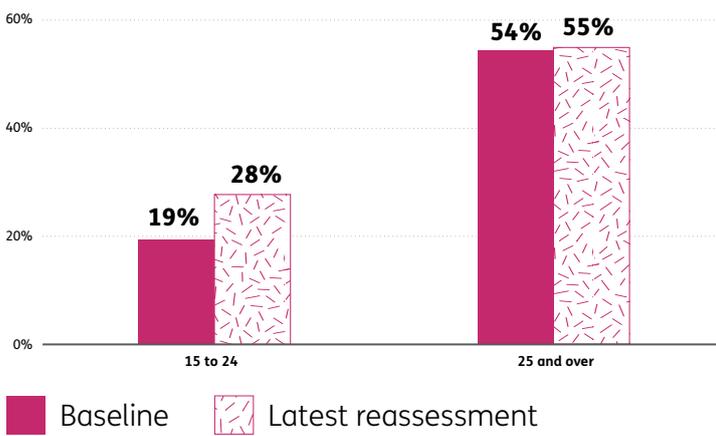

- **11 percentage point increase** from **71%** to **82%** for participants aged 15 years and over
- **11 percentage point increase** from **71%** to **82%** for participants aged 25 years and over.

The chart below shows outcomes for different age groups.

“NDIS support is helping my daughters pursue their goals and live their best lives.”

Ara-Jane, mother of Keeley, 10, and Delaney, 5

Satisfaction

In the September 2022 quarter:

the percentage of participants with a stroke disability who rated their experience with the NDIS⁶ as **good or very good** was:

* Due to the small sample size of responses collected from participants with a stroke disability this quarter, the satisfaction result shown here are subject to higher volatility than normal.

The weighted average satisfaction result for participants with a stroke disability who rated their experience as **good or very good** over the four stages of the pathway was **77%**.

- This was **78%** in the September 2021 quarter
- The overall Scheme weighted average satisfaction rate was **75%** in the September 2022 quarter.

Complaints

There were **218** complaints raised by participants with a stroke disability in the September 2022 quarter (an annualised complaint rate of **10%**⁷):

- The annualised complaint rate 12 months ago for participants with a stroke disability was **10%**, **the same as** the current quarter
- This compares to an annualised complaint rate of **7%** for all participants.

Section 4: Providers

In the September 2022 quarter:

For providers supporting participants with a stroke disability:

providers received a payment⁸

of payments were received by the top 10 providers

of these providers were companies or organisations and **42%** were individuals or sole traders

For providers supporting participants with a stroke disability who **used a plan manager**:

providers received a payment⁹

of providers were registered and **65%** were unregistered¹⁰

was paid in the September 2022 quarter (**59%** of payments to participants with a stroke disability)

For providers supporting **agency-managed** participants with a stroke disability:

providers received a payment

of providers were registered

was paid in the September 2022 quarter (**34%** of payments to participants with a stroke disability)

For providers supporting **self-managed** participants with a stroke disability, **\$17m** was paid in the September 2022 quarter (which is **7%** of all payments to participants with a stroke disability). At this time, for self-managed payments, the total number of providers and the registration status of providers is unable to be determined since it is not a requirement for self-managed participants to provide the ABN at the time of payment.

Key definitions

Definitions of terms used in this dashboard are consistent with those in Appendix A of the Quarterly Report to disability ministers published on the NDIS website.

SEIFA

1. The Australian Bureau of Statistics SEIFA Index of Education and Occupation (IEO) is used by NDIA to classify participants into socio-economic deciles, with decile one representing participants in the lowest socio-economic decile, and decile ten representing participants in the highest socio-economic decile. SEIFA deciles are allocated based on the Statistical Area 1 (SA1) that a participant lives in.

Payments

2. Supported Independent Living (SIL) is help with and/or supervision of daily tasks to develop the skills of an individual to live as independently as possible.
3. Average payments per participant are calculated using a 12 month period prior to the reporting date.
4. The average payment for the same group of participants is compared across two different time periods (12 months ending September 2022 vs 12 months ending September 2021). Payments for participants who had an initial plan approved after 30 September 2021 are not included.

Outcomes

5. The Participant Outcome section compares baseline results when participants entered the Scheme or at their first plan reassessment, with results measured at the most recent participant plan reassessment for each respondent. Results are for participants who have been in the Scheme for at least two years and NDIS trial participants are excluded. All outcome results are rounded to the nearest percentage but the percentage point increases or decreases are calculated based on the unrounded results.

Satisfaction

6. The NDIA gathers responses at the four primary stages of the participant pathway – access, pre-planning, planning and plan reassessment.

Complaints

7. The complaint rate is an annualised rate calculated as the number of complaints in the quarter divided by the active participant exposure in the quarter.

Providers

8. The count of providers is by ABN and includes providers supporting agency-managed participants, participants who use a plan manager and self-managed participants. Note that for self managed payments, the total number of providers is unable to be determined since it is not a requirement for self-managed participants to provide the ABN at the time of payment.
9. For each plan management type, a single provider is counted if they received a payment in the quarter for that plan management type. Note that a single provider can receive payments across more than one plan management type so may be included in more than one count.
10. A registered provider is an approved person or provider of supports who is registered with the NDIS Quality and Safeguard Commission. While a registered provider can provide supports to all participants, an unregistered provider can only provide supports to participants who use a plan manager or who are self-managed.
