

Supplement E:

National

This supplement shows the data for National.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability.

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

Part One: Participants and their plans

³ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

⁴ Includes all participants who were under 65 at the time of exit from residential aged care. Residential aged care exits do not include participants who are deceased or have exited the Scheme.

⁵ Other includes participants with housing support data that is unavailable.

⁶ The numbers of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

⁷ Down syndrome is included in intellectual disability, representing 2% (11,645) of all Scheme participants.

¹¹ Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

¹² Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table E.40 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Tables E.41 to E.43 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

²⁸ Note that 67% of all complainants made only one complaint, 17% made two complaints, and 16% made three or more complaints.

²⁹ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

³⁰ Percent of all registration requests is calculated as the number of complaints made by registered providers divided by the number of registered providers. The number of registered providers used in the calculation considers the length of time since the providers have submitted a registration request for the Scheme.

³¹ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

³² There are 184,795 total participant complaints in prior quarters, 20,027 total participant complaints in 2023-24 Q4, and 204,822 total participant complaints as at 30 June 2024 (which includes 3,329 unclassified participant complaints).

³⁷ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

³⁸ Supports in dispute data is only available for 2022-23 Q3 onwards.

³⁹ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

⁴⁰ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

⁴¹ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

⁴² Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

⁴³ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

⁴⁴ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

⁴⁵ Registration status is determined as at the posting date of payment.

⁴⁶ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

⁴⁷ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

⁴⁸ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

⁴⁹ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

⁵⁰ The 'benchmark' in this analysis is the national average after adjusting for the proportion of participants in Supported Independent Living (SIL) in each service district and the length of time participants have been in the Scheme.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

Of which, \$116.9 million (36%) has been allocated for specialised disability accommodation (SDA) supports, and \$204.9 million (64%) has been allocated for non-SDA supports.

⁵⁷ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement F: New South Wales

This supplement shows the data for New South Wales.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability.

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

⁵⁹ There are a further 658 active participants aged 65 years or over who are currently in residential aged care.

⁶⁰ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

⁶¹ The numbers of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

⁶³ Down syndrome is included in intellectual disability, representing 2% (3,745) of all Scheme participants in New South Wales.

⁶⁴ The results for the current quarter only include participants with SIL supports in their first plan. Participants who had an approved plan prior to the latest quarter and moved into SIL during the latest quarter are included in the prior quarters results.

⁶⁵ Down syndrome is included in intellectual disability, representing 6% (672) of participants in SIL.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table F.25 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint and by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table F.28 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table F.24 Proportion of respondents who responded positively to questions about 'Early Supports' (n = 71 in Prior Quarters, n = 62 in 2023-24 Q4), 'Community Connections' (n = 924 in Prior Quarters, n = 418 in 2023-24 Q4), 'Apply for NDIS' (n = 603 in Prior Quarters, n = 390 in 2023-24 Q4), 'Plan Approval' (n = 773 in Prior Quarters, n = 790 in 2023-24 Q4), 'Plan Implementation' (n = 617 in Prior Quarters, n = 862 in 2023-24 Q4) and 'Plan Reassessment' (n = 2,966 in Prior Quarters, n = 2,214 in 2023-24 Q4) - New South Wales ⁷⁵ ⁷⁶

⁷⁵ Positively is defined as "Yes" for Yes/No questions, and "Mostly" or "Completely" for 5-point scale questions.

⁷⁶ Initial changes to the Participant Satisfaction Survey were introduced for the December 2023 monthly data collection. Due to the resulting discontinuity, the present quarterly report only includes data from December 2023 onwards.

⁷⁷ Note that 60% of all complainants made only one complaint, 20% made two complaints and 21% made three or more complaints.

⁷⁸ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

⁷⁹ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

⁸⁰ There are 54,909 total participant complaints in prior quarters, 5,785 total participant complaints in 2023-24 Q4, and 60,694 total participant complaints as at 30 June 2024 (which includes 1,515 unclassified participant complaints).

⁸¹ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

⁸² Supports in dispute data is only available for 2022-23 Q3 onwards.

⁸³ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

⁸⁴ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table F.34 Number of active providers in 2023-24 Q4 by registration status and plan management type – New South Wales ^{85 86 87 88}

Agency-managed	1,296	0	1,296
Plan-managed	1,050	699	1,760
Self-managed	36	53	357
All management types	2,382	753	3,414

⁸⁵ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

⁸⁶ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

⁸⁷ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

⁸⁸ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

⁸⁹ Registration status is determined as at the posting date of payment.

⁹⁰ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

⁹¹ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

⁹² Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

⁹³ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

⁹⁵ Total payments for home modifications in New South Wales were \$54.9 million. Of which, \$23.1 million (42%) has been paid for specialised disability accommodation (SDA) supports, and \$31.8 million (58%) has been paid for non-SDA supports. In addition, there were once-off SDA payments of -\$0.04 million processed off-system in June 2024. Total annualised committed supports for home modifications in New South Wales were \$87.3 million. Of which, \$31.6 million (36%) has been allocated for specialised disability accommodation (SDA) supports, and \$55.7 million (64%) has been allocated for non-SDA supports.

⁹⁶ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.
June 2024 | NDIS Quarterly Report to disability ministers

Supplement G:

Victoria

This supplement shows the data for Victoria.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability. Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

⁹⁸ There are a further 529 active participants aged 65 years or over who are currently in residential aged care.

⁹⁹ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

¹⁰⁰ The number of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

¹⁰⁶ Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

¹⁰⁷ Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table G.25 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Tables G.29 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table G.24 Proportion of respondents who responded positively to questions about 'Early Supports' (n = 54 in Prior Quarters, n = 37 in 2023-24 Q4), 'Community Connections' (n = 623 in Prior Quarters, n = 353 in 2023-24 Q4), 'Apply for NDIS' (n = 472 in Prior Quarters, n = 342 in 2023-24 Q4), 'Plan Approval' (n = 862 in Prior Quarters, n = 776 in 2023-24 Q4), 'Plan Implementation' (n = 575 in Prior Quarters, n = 688 in 2023-24 Q4) and 'Plan Reassessment' (n = 2,372 in Prior Quarters, n = 1,926 in 2023-24 Q4) - Victoria ^{114 115}

¹¹⁷ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

¹¹⁸ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

¹¹⁹ There are 45,794 total participant complaints in prior quarters, 5,616 total participant complaints in 2023-24 Q4, and 51,410 total participant complaints as at 30 June 2024 (which includes 635 unclassified participant complaints).

¹²⁰ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

¹²¹ Supports in dispute data is only available for 2022-23 Q3 onwards.

¹²² Data is reported with one month lag; therefore results for last month of the current quarter are not included.

¹²³ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

¹²⁴ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

¹²⁵ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

¹²⁶ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

¹²⁷ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

¹²⁸ Registration status is determined as at the posting date of payment.

¹²⁹ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

¹³⁰ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

¹³¹ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

¹³² Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

¹³⁴ Total payments for home modifications in Victoria were \$47.7 million. Of which, \$17.6 million (37%) has been paid for specialised disability accommodation (SDA) supports, and \$30.1 million (63%) has been paid for non-SDA supports. In addition, there were once-off SDA payments of \$0.1 million processed off-system in June 2024. Total annualised committed supports for home modifications in Victoria were \$84.6 million. Of which, \$27.9 million (33%) has been allocated for specialised disability accommodation (SDA) supports, and \$56.7 million (67%) has been allocated for non-SDA supports.

¹³⁵ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.
June 2024 | NDIS Quarterly Report to disability ministers

Supplement H: Queensland

This supplement shows the data for Queensland.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability.

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

¹³⁶ The number of CALD participants excludes participants who identify as First Nations Peoples.

¹³⁷ There are a further 343 active participants aged 65 years or over who are currently in residential aged care.

¹³⁸ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

¹³⁹ The numbers of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

¹⁴⁰ Table order based on national proportions in Supplement E (highest to lowest).

¹⁴¹ Down syndrome is included in intellectual disability, representing 2% (2,468) of all Scheme participants in Queensland.

¹⁴⁵ Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

¹⁴⁶ Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table H.25 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table H.28 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

¹⁵⁵ Note that 60% of all complainants made only one complaint, 20% made two complaints and 19% made three or more complaints.

¹⁵⁶ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

¹⁵⁷ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

¹⁵⁸ There are 32,807 total participant complaints in prior quarters, 4,506 total participant complaints in 2023-24 Q4, and 37,313 total participant complaints as at 30 June 2024 (which includes 248 unclassified participant complaints).

¹⁵⁹ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

¹⁶⁰ Supports in dispute data is only available for 2022-23 Q3 onwards.

¹⁶¹ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

¹⁶² It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table H.34 Number of active providers in 2023-24 Q4 by registration status and plan management type – Queensland ^{163 164 165 166}

Agency-managed	668	0	668
Plan-managed	732	710	1,453
Self-managed	22	48	259
All management types	1,422	758	2,380

¹⁶³ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

¹⁶⁴ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

¹⁶⁵ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

¹⁶⁶ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

¹⁶⁷ Registration status is determined as at the posting date of payment.

¹⁶⁸ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

¹⁶⁹ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

¹⁷⁰ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

¹⁷¹ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

Total annualised committed supports for home modifications in Queensland were \$81.1 million. Of which, \$34.6 million (43%) has been allocated for specialised disability accommodation (SDA) supports, and \$46.6 million (57%) has been allocated for non-SDA supports.

¹⁷⁴ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement I:

Western Australia

This supplement shows the data for Western Australia.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability. Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

¹⁷⁵ The number of CALD participants excludes participants who identify as First Nations Peoples.

¹⁷⁶ There are a further 126 active participants aged 65 years or over who are currently in residential aged care.

¹⁷⁷ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table I.24 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Tables I.27 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table I.23 Proportion of respondents who responded positively to questions about ‘Early Supports’ (n = Numbers are too small in Prior Quarters, n = Numbers are too small in 2023-24 Q4), ‘Community Connections’ (n = 210 in Prior Quarters, n = 99 in 2023-24 Q4), ‘Apply for NDIS’ (n = 173 in Prior Quarters, n = 91 in 2023-24 Q4), ‘Plan Approval’ (n = 417 in Prior Quarters, n = 302 in 2023-24 Q4), ‘Plan Implementation’ (n = 167 in Prior Quarters, n = 241 in 2023-24 Q4) and ‘Plan Reassessment’ (n = 863 in Prior Quarters, n = 748 in 2023-24 Q4) - Western Australia ¹⁹¹ ¹⁹²

¹⁹⁴ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

¹⁹⁵ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

¹⁹⁶ There are 12,693 total participant complaints in prior quarters, 1,673 total participant complaints in 2023-24 Q4, and 14,366 total participant complaints as at 30 June 2024 (which includes 88 unclassified participant complaints).

¹⁹⁷ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

¹⁹⁸ Supports in dispute data is only available for 2022-23 Q3 onwards.

¹⁹⁹ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

²⁰⁰ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table I.33 Number of active providers in 2023-24 Q4 by registration status and plan management type – Western Australia ^{201 202 203 204}

Plan management type	Registered	Unregistered	Total providers

Table I.34 Total active provider payments in 2023-24 Q4 by registration status and plan management type (\$m) – Western Australia ^{205 206 207 208 209}

Plan management type	Registered	Unregistered	All registration types
Agency-managed	348	0	348
Plan-managed	310	178	495
Self-managed	12	18	114
All management types	671	196	956

²⁰¹ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

²⁰² Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

²⁰³ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

²⁰⁴ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁰⁵ Registration status is determined as at the posting date of payment.

²⁰⁶ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

²⁰⁷ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁰⁸ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

²⁰⁹ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

Of which, \$5.1 million (32%) has been paid for specialised disability accommodation (SDA) supports, and \$10.7 million (68%) has been paid for non-SDA supports. Total annualised committed supports for home modifications in Western Australia were \$31.6 million. Of which, \$9.3 million (29%) has been allocated for specialised disability accommodation (SDA) supports, and \$22.3 million (71%) has been allocated for non-SDA supports.

²¹² The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement J: South Australia

This supplement shows the data for South Australia.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

²¹³ The number of CALD participants excludes participants who identify as First Nations Peoples.

²¹⁴ There are a further 109 active participants aged 65 years or over who are currently in residential aged care.

²¹⁵ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

²²² Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

²²³ Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table J.25 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table J.28 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table J.24 Proportion of respondents who responded positively to questions about 'Early Supports' (n = Numbers are too small in Prior Quarters, n = 26 in 2023-24 Q4), 'Community Connections' (n = 246 in Prior Quarters, n = 118 in 2023-24 Q4), 'Apply for NDIS' (n = 200 in Prior Quarters, n = 110 in 2023-24 Q4), 'Plan Approval' (n = 375 in Prior Quarters, n = 357 in 2023-24 Q4), 'Plan Implementation' (n = 199 in Prior Quarters, n = 284 in 2023-24 Q4) and 'Plan Reassessment' (n = 968 in Prior Quarters, n = 794 in 2023-24 Q4) - South Australia ^{230 231}

²³³ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

²³⁴ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

²³⁶ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

²³⁷ Supports in dispute data is only available for 2022-23 Q3 onwards.

²³⁸ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

²³⁹ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table J.34 Number of active providers in 2023-24 Q4 by registration status and plan management type – South Australia ^{240 241 242 243}

Table J.35 Total active provider payments in 2023-24 Q4 by registration status and plan management type (\$m) – South Australia ^{244 245 246 247 248}

Agency-managed	281	0	281
Plan-managed	352	224	579
Self-managed	7	12	77
All management types	640	236	936

²⁴⁰ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

²⁴¹ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

²⁴² Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

²⁴³ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁴⁴ Registration status is determined as at the posting date of payment.

²⁴⁵ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

²⁴⁶ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁴⁷ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

²⁴⁸ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

Total annualised committed supports for home modifications in South Australia were \$22.0 million. Of which, \$8.8 million (40%) has been allocated for specialised disability accommodation (SDA) supports, and \$13.2 million (60%) has been allocated for non-SDA supports.

²⁵¹ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement K:

Tasmania

This supplement shows the data for Tasmania.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

Part One: Participants and their plans

²⁵² The number of CALD participants excludes participants who identify as First Nations Peoples.

²⁵³ There are a further 36 active participants aged 65 years or over who are currently in residential aged care.

²⁵⁴ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. Table K.24 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint, by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table K.27 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table K.23 Proportion of respondents who responded positively to questions about ‘Early Supports’ (n = Numbers are too small in Prior Quarters, n = Numbers are too small in 2023-24 Q4), ‘Community Connections’ (n = 33 in Prior Quarters, n = 20 in 2023-24 Q4), ‘Apply for NDIS’ (n = 44 in Prior Quarters, n = 38 in 2023-24 Q4), ‘Plan Approval’ (n = 415 in Prior Quarters, n = 232 in 2023-24 Q4), ‘Plan Implementation’ (n = 377 in Prior Quarters, n = 173 in 2023-24 Q4) and ‘Plan Reassessment’ (n = 595 in Prior Quarters, n = 368 in 2023-24 Q4) - Tasmania ²⁶⁸ ²⁶⁹

²⁷¹ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

²⁷² It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

²⁷³ There are 3,671 total participant complaints in prior quarters, 357 total participant complaints in 2023-24 Q4, and 4,028 total participant complaints as at 30 June 2024 (which includes 39 unclassified participant complaints).

²⁷⁴ The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

²⁷⁵ Supports in dispute data is only available for 2022-23 Q3 onwards.

²⁷⁶ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

²⁷⁷ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table K.33 Number of active providers in 2023-24 Q4 by registration status and plan management type – Tasmania ^{278 279 280 281}

Table K.34 Total active provider payments in 2023-24 Q4 by registration status and plan management type (\$m) – Tasmania ^{282 283 284 285 286}

Agency-managed	104	0	104
Plan-managed	85	59	144
Self-managed	4	8	21
All management types	192	66	269

²⁷⁸ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

²⁷⁹ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

²⁸⁰ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

²⁸¹ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁸² Registration status is determined as at the posting date of payment.

²⁸³ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

²⁸⁴ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

²⁸⁵ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

²⁸⁶ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

²⁹² The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement L: Australian Capital Territory

This supplement shows the data for Australian Capital Territory.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

When not shown as a separate disability type, down syndrome is counted within intellectual disability.

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

²⁹³ The number of CALD participants excludes participants who identify as First Nations Peoples.

²⁹⁴ The age breakdown of YPIRAC participants in ACT cannot be reported due to small numbers.

²⁹⁵ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. There are insufficient numbers to show the incremental and cumulative count of active participants in residential aged care for the December 2020 quarter and after the June 2021 quarter. Quarterly results are reported based on a rolling 3 year period.

³⁰² Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

³⁰³ Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

Part Two: Participant and family/carer outcomes

Participant outcome results that were reported in previous QRDM supplements can now be found in the baseline outcomes and longitudinal outcomes datasets. These are available under “participant numbers and outcomes” on the “participant datasets” page of the NDIS website (<https://dataresearch.ndis.gov.au/datasets/participant-datasets>).

Part Three: Participant experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. The tables show quarterly trends in complaints based on experience over 3 years. Table L.25 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint and by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table L.28 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

Table L.24 Proportion of respondents who responded positively to questions about ‘Early Supports’ (n = Numbers are too small in Prior Quarters, n = Numbers are too small in 2023-24 Q4), ‘Community Connections’ (n = 56 in Prior Quarters, n = Numbers are too small in 2023-24 Q4), ‘Apply for NDIS’ (n = 51 in Prior Quarters, n = 29 in 2023-24 Q4), ‘Plan Approval’ (n = 55 in Prior Quarters, n = 91 in 2023-24 Q4), ‘Plan Implementation’ (n = 40 in Prior Quarters, n = 31 in 2023-24 Q4) and ‘Plan Reassessment’ (n = 204 in Prior Quarters, n = 133 in 2023-24 Q4) - Australian Capital Territory ^{310 311}

³¹³ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

³¹⁷ Supports in dispute data is only available for 2022-23 Q3 onwards.

³¹⁸ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

³¹⁹ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table L.34 Number of active providers in 2023-24 Q4 by registration status and plan management type – Australian Capital Territory ^{320 321 322 323}

Plan management type	Registered	Unregistered	Total providers
Agency-managed	328	0	328

Table L.35 Total active provider payments in 2023-24 Q4 by registration status and plan management type (\$m) – Australian Capital Territory ^{324 325 326 327 328}

Plan management type	Registered	Unregistered	All registration types
Agency-managed	55	0	55
Plan-managed	59	24	83
Self-managed	3	3	25
All management types	116	27	163

³²⁰ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

³²¹ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

³²² Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

³²³ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

³²⁴ Registration status is determined as at the posting date of payment.

³²⁵ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

³²⁶ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

³²⁷ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

³²⁸ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. ³³¹ The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement M: Northern Territory

This supplement shows the data for Northern Territory.

The national rollout of the NDIA's new computer system and processes started as planned on 30 October 2023 and the report combines data from the old and new computer systems. The proportions of First Nations, CALD, Other gender, 0-6 age group, missing level of function, access met and first planning decisions, Other disability types and mainstream services in the old computer system have been impacted by adaptation to the new computer system processes. There may be some minor restatements of information in this report as data is further refined.

Please also consider the following when interpreting results in this supplement:

The NDIA has observed reduced volumes of access and first planning decisions during the December and March quarters, which also reflects less people being included in outcome surveys. This is attributed to adaptation to the new system and integration of new processes, alongside balancing workloads across two systems and capability building for NDIA staff and NDIS partners.

When not shown as a separate disability type, down syndrome is counted within intellectual disability.

Percentage figures have been rounded and may not always total to one hundred per cent.

Totals include participants with missing characteristics, where applicable.

Reported PCI figures exclude counts of 'withdrawn' or 'miscategorised' PCIs.

Counts of AAT supports in dispute were understated in the 2023-24 Q2 and 2023-24 Q3 QRDM supplements.

The utilisation rate for the current financial year will likely increase due to a lag between when support is provided and when it is paid.

Throughout the supplements, results are not adjusted for underlying differences in population characteristics, and hence comparisons of the results for subsections of the population should be interpreted with caution.

There are five parts to the supplement.

Part One: Participants and their plans

³³³ The age breakdown of YPIRAC participants in NT cannot be reported due to small numbers.

³³⁴ The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

³³⁵ The number of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

³³⁶ Table order based on national proportions in Supplement E (highest to lowest).

³³⁷ Down syndrome is included in intellectual disability, representing 2% (105) of all Scheme participants in Northern Territory.

³³⁸ The results for the current quarter only include participants with SIL supports in their first plan. Participants who had an approved plan prior to the latest quarter and moved into SIL during the latest quarter are included in the prior quarters results.

³³⁹ Down syndrome is included in intellectual disability, representing 3% (15) of participants in SIL.

Part Three: Participant Experience

The tables in Part Three summarise complaints submitted from the 1 July 2016 until the end of 2023-24 Q4. The tables show quarterly trends in complaints based on experience over 3 years. Table M.24 shows the number of complaints in 2023-24 Q4 compared with previous quarters by the source of complaint and by the complaint subject, and PCIs in 2023-24 Q4 compared with previous quarters. The list of complaint subjects reflects the combination of all options.

Table M.27 shows the number of complaints by type as well as by source and subject of complaint based on records. These results include all complaints submitted from 1 July 2016 and complaints made during that quarter.

Prior to October 2019, complaints were entered in CRM via a feedback item in the **'My Feedback'** tile. The **'My Customer Requests'** tile in the CRM was launched on 7 October 2019 with enhanced capability to record complaints and hence, most of the complaints received by the NDIA from October 2019 to October 2023 were captured in the **'My Customer Requests'** tile (noting the previous **'My Feedback'** tile was still being used in a small number of cases).

Participant Critical Incident (PCI) data up to and including October 2023 was captured by the Escalation and Participant Incident Team (EaPIT). Recording of complaints and PCIs commenced transitioning to the new computer system on 30 October 2023. The new computer system provides improved functionality to complaints and PCI reporting.

The numbers of complaints reported for the last six months may still increase as there is a lag in data collection. Numbers might change further as complaints reporting in the new computer system is refined. On the **'My Customer Requests'** tile and in the new computer system, it is possible to record multiple related parties as the source of a complaint. In some cases, different complainant types (participants, providers or other parties) are linked to a single complaint. As a result, the sum of participant complaints, provider complaints and other complaints is higher than the total number of complaints.

In the last 3 quarters, the Agency has experienced higher than usual levels of contact from participants, which has resulted in increased volumes of complaints. The NDIA is prioritising the resolution of these complaints and is supporting its workforce to continue to build capability with the new system and processes.

³⁵⁰ Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

³⁵¹ It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

³⁵⁵ Supports in dispute data is only available for 2022-23 Q3 onwards.

³⁵⁶ Data is reported with one month lag; therefore results for last month of the current quarter are not included.

³⁵⁷ It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

Part Four: Providers and the growing market

Part 4 has been updated to focus on active provider counts and payments made to these providers across varying registration status and plan management types. Part 4 aligns with Section 4 of the main report.

Table M.32 Number of active providers in 2023-24 Q4 by registration status and plan management type – Northern Territory ^{358 359 360 361}

Plan management type	Registered	Unregistered	Total providers
Agency-managed	266	0	266

Self-managed	72	245	317
All plan management types	659	1,474	2,125

Table M.33 Total active provider payments in 2023-24 Q4 by registration status and plan management type (\$m) – Northern Territory ^{362 363 364 365 366}

Plan management type	Registered	Unregistered	All registration types
Agency-managed	77	0	77
Plan-managed	63	24	87
Self-managed	0	1	4
All management types	141	24	168

³⁵⁸ Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

³⁵⁹ Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

³⁶⁰ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

³⁶¹ The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

³⁶² Registration status is determined as at the posting date of payment.

³⁶³ Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

³⁶⁴ Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

³⁶⁵ Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

³⁶⁶ Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

Part Five: Financial sustainability

In Part 5 average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the sum of the payments in the 12 months prior to 30 June 2024, divided by the average number of participants that are active per working day in each month over the same period. They have been rounded to the nearest hundred dollars.

³⁷⁰ Service districts are defined by the current address the participant resides in. 'Other' includes participants where the service district information is missing.

³⁷¹ Core supports enable participants to complete activities of daily living. Participant budgets often have a lot of flexibility to choose specific supports with their core support budgets but cannot reallocate this funding for other support purposes (i.e. capital or capacity building supports).

³⁷² Capacity building supports enable participants to build their independence and skills. Participant budgets are allocated at a support category level and must be used to achieve the goals set out in the participant's plan.

³⁷³ Capital supports are investments, such as assistive technologies – equipment, home or vehicle modifications, or for Specialist Disability Accommodation (SDA). Participant budgets for this support purpose are restricted to specific items identified in the participant's plan.

³⁷⁴ The phasing date shown for Hunter New England is for the Hunter Trial Site.

³⁷⁵ Since the phasing schedule for South Australia is by age, each service district in the state has the phasing date Jul-13.

³⁷⁶ Since the phasing schedule for Tasmania is by age, each service district in the state has the phasing date Jul-13.

³⁷⁷ Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

³⁷⁸ Service districts are defined by the current address the participant resides in. 'Other' includes participants where the service district information is missing.

³⁷⁹ Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

³⁸⁰ Average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the average of the annualised monthly payments in the 12 months period to 30 June 2024, weighted by the participants that are active in each month over the same period. They have been rounded to the nearest hundred dollars. Figures are not shown if there is insufficient data in the group.

³⁸¹ Service districts are defined by the current address the participant resides in. 'Other' includes participants where the service district information is missing.

³⁸² Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

³⁸³ Average annualised committed supports are derived from total annualised committed supports in the current plans of active participants at 30 June 2024. Average payments are calculated as the average of the annualised monthly payments in the 12 months period to 30 June 2024, weighted by the participants that are active in each month over the same period. They have been rounded to the nearest hundred dollars. Figures are not shown if there is insufficient data in the group.

³⁸⁴ Participation rate refers to the proportion of general population that are NDIS participants.

³⁸⁵ A small portion (<0.1%) of NDIS participants do not reside in the service districts shown above. Participation rates for this cohort are not provided due to the absence of a corresponding population figure.

³⁸⁸ Participation rate refers to the proportion of general population that are NDIS participants.

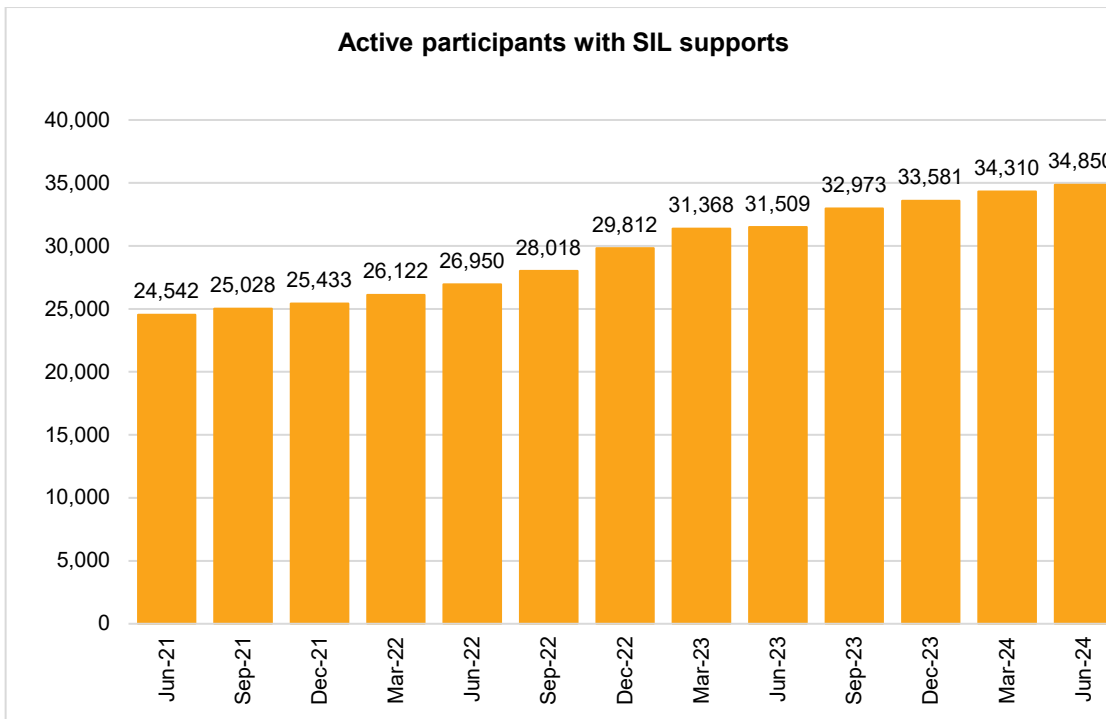

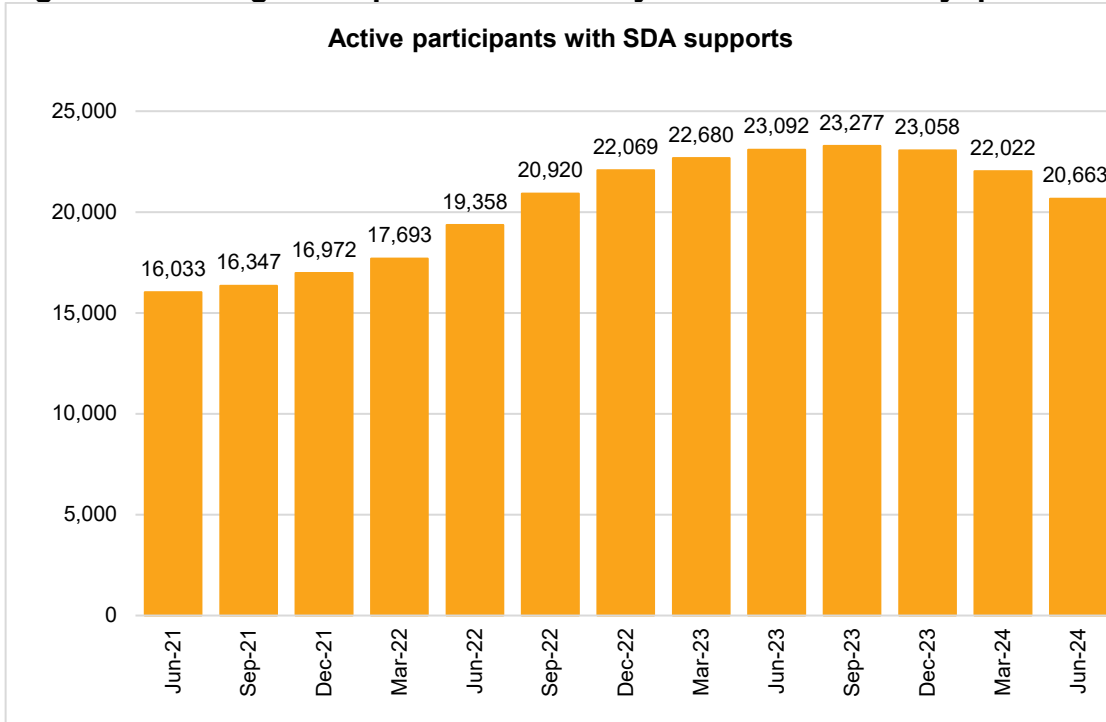

³⁸⁹ A small portion (<0.1%) of NDIS participants do not reside in the service districts shown above. Participation rates for this cohort are not provided due to the absence of a corresponding population figure.

³⁹² State/Territory is defined by the current residing address of the participant.

³⁹³ Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

³⁹⁴ Annualised supports committed to SDA in current plans refer to annualised supports committed for active participants who have SDA in their plans at 30 June 2024.

³⁹⁵ Active providers of SDA supports in this table refer to any provider that has received a payment for providing SDA supports to Agency-managed participants residing in the given jurisdiction.

³⁹⁶ Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

³⁹⁷ Providers can be registered in more than one jurisdiction. Therefore, the National Totals of active providers is not equal to the respective sums across all states and territories.

SDA Building Types:

Existing: Dwellings built before 1 April 2016 that were used as disability related supported accommodation under a previous State, Territory or Commonwealth scheme. Existing dwellings must substantially comply with the requirements of a new build, and must meet the maximum resident requirement (5 residents or less).

Legacy: Existing dwellings that do not meet the maximum resident requirement of 5 residents or less. Over time, the NDIA will stop making SDA payments towards Legacy dwellings.

New Build: An SDA dwelling that was built (has a certificate of occupancy dated) after 1 April 2016 and meets all of the requirements under the SDA Rules and NDIS Price Guide.

New Build (refurbished): A dwelling that was built before 1 April 2016 but has been significantly refurbished since and now meets all of the requirements for a new build in the SDA Rules and NDIS Price Guide. In order to qualify for as a New Build (refurbished) providers must spend a minimum amount. These minimum amounts are specified per dwelling type in the SDA Price Guide.

The SA3 and SA4 regions have been updated from the 2011 boundaries to 2016 boundaries in March 2023. The changes to the SA boundaries can be found on the Australian Bureau of Statistics website.

SDA in-kind arrangements for Tasmania have phased out as at 30 June 2023 in line with the rest of Australia. Reporting on enrolled in-kind dwellings has been removed as States and Territories have transitioned ownership of State-Owned dwellings to private ownership.

³⁹⁸ SDA pipeline data is based on information collected by the NDIA from SDA providers who are building properties they intend to enrol as SDA at a later date. This data is intended for the purpose of SDA market oversight only and there is no guarantee from the NDIA that all the dwellings listed will be enrolled as SDA. There may also be under-construction properties which will be enrolled as SDA which are not represented in the data. Since July 2021, it has become mandatory for SDA providers or future SDA providers to inform the NDIA at the design stage of any proposed SDA dwellings, thus increasing the pipeline data available. There may be delays in excluding enrolled SDA dwellings from unenrolled SDA data. This may result in unenrolled SDA numbers being overstated in a given reporting period. Work is underway to improve accuracy of unenrolled SDA dwellings reporting.

³⁹⁹ The total number of Participants with SDA funding is currently split into “Participants with SDA funding, SDA in use” and “Participants with SDA funding, SDA not in use”. Evidence of SDA funding in use is estimated based on SDA payments, SDA service bookings and address matching to an enrolled SDA dwelling. Future enhancements to the PACE system will allow for better tracking and an ability to better understand why participants may not be using SDA funding. The number of additional participants eligible for SDA funding are participants who have been found eligible for SDA through the home and living application process who don't yet have SDA funding in their plan. There are a number of participants who were found eligible through the legacy CRM process that require further investigation.

⁴⁰⁰The total number of Participants with SDA funding is currently split into “Participants with SDA funding, SDA in use” and “Participants with SDA funding, SDA not in use”. Evidence of SDA funding in use is estimated based on SDA payments, SDA service bookings and address matching to an enrolled SDA dwelling. Future enhancements to the PACE system will allow for better tracking and an ability to better understand why participants may not be using SDA funding. The number of additional participants eligible for SDA funding are participants who have been found eligible for SDA through the home and living application process who don't yet have SDA funding in their plan. There are a number of participants who were found eligible through the legacy CRM process that require further investigation.

Supplement E

1 The number of CALD participants excludes participants who identify as First Nations Peoples.

2 There are a further 1,835 active participants aged 65 years or over who are currently in residential aged care.

3 The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

4 Includes all participants who were under 65 at the time of exit from residential aged care. Residential aged care exits do not include participants who are deceased or have exited the Scheme.

5 Other includes participants with housing support data that is unavailable.

6 The numbers of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

7 Down syndrome is included in intellectual disability, representing 2% (11,645) of all Scheme participants.

8 The results for the current quarter only include participants with Supported Independent Living (SIL) supports in their first plan. Participants who had an approved plan prior to the latest quarter and moved into Supported Independent Living (SIL) during the latest quarter are included in the prior quarters' results.

9 Down syndrome is included in intellectual disability, representing 6% (2,214) of participants in SIL.

10 Down syndrome is included in intellectual disability, representing 2% (9,431) of participants not in SIL.

11 Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

12 Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

13 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2022 and have had a second plan reassessment to date.

- 14 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2021 and have had a third plan reassessment to date.
- 15 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2020 and have had a fourth plan reassessment to date.
- 16 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2019 and have had a fifth plan reassessment to date.
- 17 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2018 and have had a sixth plan reassessment to date.
- 18 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2017 and have had a seventh plan reassessment to date.
- 19 Reporting on PSG 8 commenced in the March 2024 quarter.
- 20 Note that plans are extended automatically if they have not been reassessed before expiry so participants have continuity of support.
- 21 From the March 2024 quarter, performance is measured from available data on processes and dates. Milestones being built into the new computer system will improve the capture of performance data.
- 22 Where a Participant Reassessment Request has been closed and then reopened, the timeframe is measured each time the task is closed in this table.
- 23 From the March 2024 quarter, performance is measured from available data on processes and dates. Milestones being built into the new computer system will improve the capture of performance data.

- 25 From the March 2024 quarter, performance is measured from available data on processes and dates. Milestones being built into the new computer system will improve the capture of performance data.
- 26 Positively is defined as "Yes" for Yes/No questions, and "Mostly" or "Completely" for 5-point scale questions.

- 27 Initial changes to the Participant Satisfaction Survey were introduced for the December 2023 monthly data collection. Due to the resulting discontinuity, the present quarterly report only includes data from December 2023 onwards.
- 28 Note that 67% of all complainants made only one complaint, 17% made two complaints, and 16% made three or more complaints.
- 29 Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.
- 30 Percent of all registration requests is calculated as the number of complaints made by registered providers divided by the number of registered providers. The number of registered providers used in the calculation considers the length of time since the providers have submitted a registration request for the Scheme.
- 31 It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.
- 32 There are 184,795 total participant complaints in prior quarters, 20,027 total participant complaints in 2023-24 Q4, and 204,822 total participant complaints as at 30 June 2024 (which includes 3,329 unclassified participant complaints).
- 33 There are 10,409 total provider complaints in Prior Quarters, 775 total provider complaints in 2023-24 Q4, and 11,184 total provider complaints as at 30 June 2024 (which includes 247 unclassified provider complaints).
- 34 There are 7,550 total other complaints in Prior Quarters, 357 total other complaints in 2023-24 Q4, and 7,907 total other complaints as at 30 June 2024 (which includes 116 unclassified other complaints).
- 35 Complaints linked to multiple related parties have been treated as one complaint in order to show the total number of unique complaints. This total will not be equal to the sum of participant, provider and other complaints.
- 36 There are 198,862 total unique complaints in Prior Quarters, 21,153 total unique complaints in 2023-24 Q4, and 220,015 total unique complaints as at 30 June 2024 (which includes 3,692 unclassified unique complaints).
- 37 The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.
- 38 Supports in dispute data is only available for 2022-23 Q3 onwards.
- 39 Data is reported with one month lag; therefore results for last month of the current quarter are not included.

- 40 It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.
- 41 Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.
- 42 Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.
- 43 Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.
- 44 The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.
- 45 Registration status is determined as at the posting date of payment.
- 46 Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.
- 47 Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.
- 48 Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.
- 49 Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.
- 50 The 'benchmark' in this analysis is the national average after adjusting for the proportion of participants in Supported Independent Living (SIL) in each service district and the length of time participants have been in the Scheme.

122 Data is reported with one month lag; therefore results for last month of the current quarter are not included.

123 It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

124 Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

125 Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers

unique providers; therefore, it will be lower than the sum of registered and unregistered providers.

126 Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.

127 The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

128 Registration status is determined as at the posting date of payment.

129 Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments.

130 Provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.

131 Payments are on a cash and in-kind basis. In-kind payments are included in the total agency-managed payments to registered providers.

132 Payments for 'All registration types' include payments associated with providers with a missing Australian Business Number.

133 Total payments for home modifications in Victoria were \$73.5 million. Of which, \$72.9 million (99.1%) has been paid for specialised disability accommodation (SDA) supports, and \$0.6 million (0.9%) has been paid for non-SDA supports. Total annualised committed supports for home modifications in Victoria were \$97.9 million. Of which, \$97.0 million (99%) has been allocated for specialised disability accommodation (SDA) supports, and \$1.0 million (1%) has been allocated for non-SDA supports.

134 Total payments for home modifications in Victoria were \$47.7 million. Of which, \$17.6 million (37%) has been paid for specialised disability accommodation (SDA) supports, and \$30.1 million (63%) has been paid for non-SDA supports. In addition, there were once-off SDA payments of \$0.1 million processed off-system in June 2024. Total annualised committed supports for home modifications in Victoria were \$84.6 million. Of which, \$27.9 million (33%) has been allocated for specialised disability accommodation (SDA) supports, and \$56.7 million (67%) has been allocated for non-SDA supports.

135 The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement H

136 The number of CALD participants excludes participants who identify as First Nations Peoples.

137 There are a further 343 active participants aged 65 years or over who are currently in residential aged care.

138 The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. Quarterly results are reported based on a rolling 3 year period.

139 The numbers of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

140 Table order based on national proportions in Supplement E (highest to lowest).

141 Down syndrome is included in intellectual disability, representing 2% (2,468) of all Scheme participants in Queensland.

142 The results for the current quarter only include participants with SIL supports in their first plan. Participants who had an approved plan prior to the latest quarter and moved into SIL during the latest quarter are included in the prior quarters results.

143 Down syndrome is included in intellectual disability, representing 7% (459) of participants in SIL.

144 Down syndrome is included in intellectual disability, representing 1% (2,009) of participants not in SIL.

145 Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.

146 Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.

147 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2022 and have had a second plan reassessment to date.

148 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2021 and have had a third plan reassessment to date.

149 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2020 and have had a fourth plan reassessment to date.

150 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first

plan approved between 1 July 2016 and 30 June 2019 and have had a fifth plan reassessment to date.

151 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2018 and have had a sixth plan reassessment to date.

152 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2017 and have had a seventh plan reassessment to date.

153 Positively is defined as "Yes" for Yes/No questions, and "Mostly" or "Completely" for 5-point scale questions.

154 Initial changes to the Participant Satisfaction Survey were introduced for the December 2023 monthly data collection. Due to the resulting discontinuity, the present quarterly report only includes data from December 2023 onwards.

155 Note that 60% of all complainants made only one complaint, 20% made two complaints and 19% made three or more complaints.

156 Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

157 It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

158 There are 32,807 total participant complaints in prior quarters, 4,506 total participant complaints in 2023-24 Q4, and 37,313 total participant complaints as at 30 June 2024 (which includes 248 unclassified participant complaints).

159 The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

- 278 Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.
- 279 Registration status is determined as at the posting date of payment. If a provider's registration status changes during the quarter, they will be included in both the registered and unregistered provider count. The total provider count only considers unique providers; therefore, it will be lower than the sum of registered and unregistered providers.
- 280 Plan management fees, which are Agency-managed payments, are reclassified as Plan-managed payments for the purpose of counting providers. Therefore, the count of Agency-managed providers excludes providers that only received plan management fees and no other Agency-managed payments.
- 281 The number of self-managed providers is understated as provider information for self-managed participants is provided on a voluntary basis. In the June 2024 quarter, provider information was provided for 20.6% of all self-managed payment transactions.
- 282 Registration status is determined as at the posting date of payment.

290 Total payments for home modifications in Tasmania were \$1.81 million. Of which, \$1.49 million (83%) has been paid for specialised disability accommodation (SDA) supports, and \$0.31 million (17%) has been paid for non-SDA supports. Total annualised committed supports for home modifications in Tasmania were \$8.0 million. Of which, \$7.7 million (96.6%) has been allocated for specialised disability accommodation (SDA) supports, and \$0.3 million (3.4%) has been allocated for non-SDA supports.

291 Total payments for home modifications in Tasmania were \$4.1 million. Of which, \$0.3 million (8%) has been paid for specialised disability accommodation (SDA) supports, and \$3.8 million (92%) has been paid for non-SDA supports. Total annualised committed supports for home modifications in Tasmania were \$6.8 million. Of which, \$1.2 million (17%) has been allocated for specialised disability accommodation (SDA) supports, and \$5.7 million (83%) has been allocated for non-SDA supports.

292 The utilisation rate for 2023-24 will likely increase due to a lag between when support is provided and when it is paid.

Supplement L

293 The number of CALD participants excludes participants who identify as First Nations Peoples.

294 The age breakdown of YPIRAC participants in ACT cannot be reported due to small numbers.

295 The cumulative results are measured as the numbers of active participants in residential aged care at the end of each quarter. The incremental results are the change in cumulative number of active participants in residential aged care each quarter. There are insufficient numbers to show the incremental and cumulative count of active participants in residential aged care for the December 2020 quarter and after the June 2021 quarter. Quarterly results are reported based on a rolling 3 year period.

296 The number of participants residing in remote and very remote areas are based on the Modified Monash Model (MMM) measure of remoteness. Unadjusted values of the MMM were utilised from the March 2024 quarter which has resulted in a re-distribution of remoteness across participant profiles.

297 Table order based on national proportions in Supplement E (highest to lowest).

298 Down syndrome is included in intellectual disability, representing 2% (227) of all Scheme participants in Australian Capital Territory.

299 The results for the current quarter only include participants with SIL supports in their first plan. Participants who had an approved plan prior to the latest quarter and moved into SIL during the latest quarter are included in the prior quarters results.

- 300 Down syndrome is included in intellectual disability, representing 7% (44) of participants in SIL.
- 301 Down syndrome is included in intellectual disability, representing 2% (183) of participants not in SIL.
- 302 Participation rate refers to the proportion of general population that are NDIS participants. A small proportion of participants aged 0 to 64 years have a gender of 'Other'. The participation rates for this group are included within the total rates.
- 303 Trial participants (participants with initial plans approved prior to 1 July 2016) are not included.
- 304 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2022 and have had a second plan reassessment to date.
- 305 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2021 and have had a third plan reassessment to date.
- 306 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2020 and have had a fourth plan reassessment to date.
- 307 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2019 and have had a fifth plan reassessment to date.
- 308 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2018 and have had a sixth plan reassessment to date.
- 309 Results are drawn from participants' responses to Short Form Outcomes Framework (SFOF) questionnaires, and only include participants who had their first plan approved between 1 July 2016 and 30 June 2017 and have had a seventh plan reassessment to date.
- 310 Positively is defined as "Yes" for Yes/No questions, and "Mostly" or "Completely" for 5-point scale questions.
- 311 Initial changes to the Participant Satisfaction Survey were introduced for the December 2023 monthly data collection. Due to the resulting discontinuity, the present quarterly report only includes data from December 2023 onwards.
- 312 Note that 58% of all complainants made only one complaint, 21% made two complaints and 21% made three or more complaints.

313 Percentage of the number of active participants is calculated as the number of complaints made by people who have sought access divided by the number of active participants. The number of active participants used in the calculation takes into account the length of time participants have been in the Scheme.

314 It is possible to record multiple related parties as the source of a complaint, and in some cases, both participants and providers or other parties are linked to a single complaint. Where both a participant and a provider are a related party to a single complaint, the case is counted under both categories.

315 There are 3,804 total participant complaints in prior quarters, 235 total participant complaints in 2023-24 Q4, and 4,039 total participant complaints as at 30 June 2024 (which includes 167 unclassified participant complaints).

316 The Tribunal will affirm the decision under review if it finds that the NDIA has made the correct decision, or vary the decision under review if it finds the NDIA's decision should be altered in some way. The Tribunal will set aside the decision under review if it finds that the NDIA has made a wholly or partially incorrect decision. In this case they can replace the NDIA's decision, or send the case back to the NDIA with considerations to be taken when making a new decision.

317 Supports in dispute data is only available for 2022-23 Q3 onwards.

318 Data is reported with one month lag; therefore results for last month of the current quarter are not included.

319 It is possible to record multiple supports in one AAT, hence the sum of the individual type of supports exceed the total in each period.

320 Active providers refer to those who have received payment in the quarter for supporting NDIS participants. The count of active providers excludes providers with a missing Australian Business Number.

321 Registration status is determined as at the posting date of payment. 370 Service districts are defined by the current address the participant resides in. 'Other' includes participants where the service district information is missing.

371 Core supports enable participants to complete activities of daily living. Participant budgets often have a lot of flexibility to choose specific supports with their core support budgets but cannot reallocate this funding for other support purposes (i.e. capital or capacity building supports).

372 Capacity building supports enable participants to build their independence and skills. Participant budgets are allocated at a support category level and must be used to achieve the goals set out in the participant's plan.

373 Capital supports are investments, such as assistive technologies – equipment, home or vehicle modifications, or for Specialist Disability Accommodation (SDA). Participant budgets for this support purpose are restricted to specific items identified in the participant's plan.

Average payments are calculated as the average of the annualised monthly payments in the 12 months period to 30 June 2024, weighted by the participants that are active in each month over the same period. They have been rounded to the nearest hundred dollars. Figures are not shown if there is insufficient data in the group.

394 Annualised supports committed to SDA in current plans refer to annualised supports committed for active participants who have SDA in their plans at 30 June 2024.

395 Active providers of SDA supports in this table refer to any provider that has received a payment for providing SDA supports to Agency-managed participants residing in the given jurisdiction.

396 Other Territories includes Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

397 Providers can be registered in more than one jurisdiction. Therefore, the National Totals of active providers is not equal to the respective sums across all states and territories.

398 SDA pipeline data is based on information collected by the NDIA from SDA providers who are building properties they intend to enrol as SDA at a later date. This data is intended for the purpose of SDA market oversight only and there is no guarantee from the NDIA that all the dwellings listed will be enrolled as SDA. There may also be under-construction properties which will be enrolled as SDA which are not represented in the data. Since July 2021, it has become mandatory for SDA providers or future SDA providers to inform the NDIA at the design stage of any proposed SDA dwellings, thus increasing the pipeline data available. There may be delays in excluding enrolled SDA dwellings from unenrolled SDA data. This may result in unenrolled SDA numbers being overstated in a given reporting period. Work is underway to improve accuracy of unenrolled SDA dwellings reporting.

399 The total number of Participants with SDA funding is currently split into "Participants with SDA funding, SDA in use" and "Participants with SDA funding, SDA not in use". Evidence of SDA funding in use is estimated based on SDA payments, SDA service bookings and address matching to an enrolled SDA dwelling. Future enhancements to the PACE system will allow for better tracking and an ability to better understand why participants may not be using SDA funding. The number of additional participants eligible for SDA funding are participants who

have been found eligible for SDA through the home and living application process who don't yet have SDA funding in their plan. There are a number of participants who were found eligible through the legacy CRM process that require further investigation.
