The NDIA is sharing insights collected through data and surveys about the ongoing experiences of participants, their families and carers during their time in the scheme.

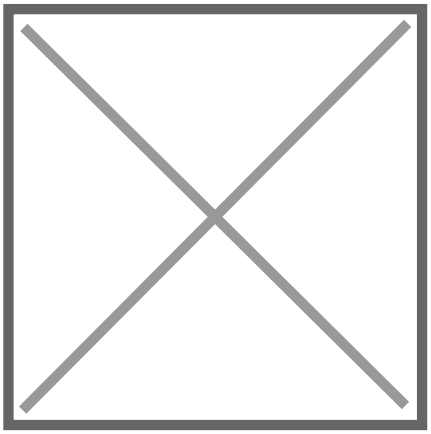

Insights and reports in this section include

- people with disability and their NDIS goals
- outcomes of participants over time as part of ongoing longitudinal analysis
- outcomes of families and carers as they navigate the scheme
- and single deep dive analyses, investigating areas such as health and wellbeing, employment and the impacts of COVID-19

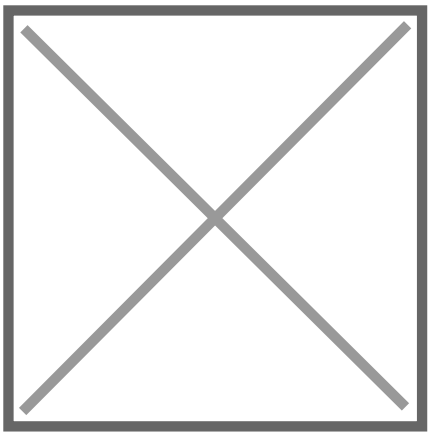

The latest annual outcomes reports for participants, their families and carers are now available.

The privacy of participants is very important. The NDIA has applied de-identification methods so the released data is non-personal and does not identify individuals.
