Working with NDIS participants to understand and measure their experiences with the Scheme is an important part of our work.

The health and wellbeing report uses the NDIS Outcomes Framework survey to understand health and wellbeing outcomes for NDIS participants and their families/carers.

The data in this report is current to 30 June 2023.?

The report compares health and wellbeing measures of participants and their families/carers when they enter the NDIS with the general population.

It also looks at changes in key measures for participants and their families/carers over their time in the Scheme.

Note: the information on these pages is subject to a Data disclaimer.
