'Baseline outcomes for families and carers of NDIS participants 30 June 2020' summarises baseline results for families and carers of NDIS participants entering the Scheme during the four year period from 1 July 2016 to 30 June 2020.

'Longitudinal outcomes for families and carers of NDIS participants 30 June 2020' summarises longitudinal outcomes for families and carers of participants who have been in the Scheme for one year or more at 30 June 2020.

Where relevant, the baseline and the longitudinal reports have analysed the impact of COVID-19 on outcome indicators.

Two previous reports have covered both baseline and longitudinal experience of families and carers, as at 30 June 2018 and 30 June 2019.

Leveraging research conducted by the NDIS Independent Advisory Council (IAC), the outcomes framework takes a lifespan approach to the measurement of outcomes. Family/carer questionnaires have been developed for three different participant age groups: 0 to 14, 15 to 24, and 25 and over, in order to recognise the different issues faced by families and carers as the participant they support grows older.

The reports are organised with separate chapters for each of these participant age groups, bringing together analyses from all data sources. High level summaries of results for all questions are included in separate volumes of appendices. Data shown in the appendices are included as csv files in zipped format.
